

Advanced Presentation Skills

Welcome to the Advanced Presentation Skills Training.

A person's ability to speak to large crowds, maintain their attention, and convey a message is a well-used skill in their skillset. Effectively conducting speaking activities and in this case facilitating presentations in general is extremely valuable and highly useful for most companies. It's a balance between teacher, public speaker, and demonstrator; all of which are already difficult on their own, but increasingly stressful on a speaker when all three are demanded at once. Not to mention how much this effort is required to balance all of these while maintaining their intended audience's attention.

The Advanced Presentation Skills Training program can provide the tools and guidance you require to deliver an outstanding presentation, allowing your audience to become more engaged and informed about your organisation and its activities.

Course Overview

You will spend the first part of the session getting to know participants and discussing what will take place during the workshop. Students will also have an opportunity to identify their personal learning objectives.

This one-day workshop will help you teach participants how to:

- Properly develop expanded presentations
- Create more effective, impactful presentation.
- Maximize efficiency in the presentation creation progress.
- Review and refine presentation techniques.
- Manage and avoid pitfalls despite their now and suddenly limited options.

Develop Expanded Presentations

First, participants will be given techniques on how to effectively cater to these demands for more material or greater complexity while also remaining within the restrictions that have been heavily imposed on the presenter by their clientele.

More Effective, Impactful Presentations

As advanced presenters, clients expect them to be far more effective at giving their presentations. Such material and assistance will be made available to participants in this session and is hoped will be fully utilized by them.

Efficiency In The Presentation Creation Progress

In this session, participants are taught vital lessons to help improve the presenter's ability to create these with increased efficiency.

Review And Refine Presentation Techniques

Here, participants will be allowed to go back to basics and relearn and review previously learned material, and be given ample opportunities to review and polish their techniques from posture, language, and use of both therein.

Manage And Avoid Pitfalls

Nothing is perfect. Contingencies can be made, workarounds can be constructed, and a lecturer can prepare for any instance where one component or another of their presentation can end up failing, and to reinforce that participants undertaking this training will be taught how to avoid and mitigate these errors and mistakes, ranging from errors in their presentation to common acts and gestures that can be misinterpreted.

Workshop Wrap-Up

At the end of the course, students will have an opportunity to ask questions and fill out an action plan.
